Work Experience

Engineering Intern

October 2025 – Present 2026 | **Dewesoft d.o.o**

- Multidisciplinary rotation in DAQ engineering.

Backend Engineer

March 2025 – October 2026 | **Tridens d.o.o**

- Designed, build and maintain distributed backend systems and real-time APIs for EV charging infrastructure.

Programmer

August 2024 – June 2025 | **Setronica d.o.o**

- Ensured AI model quality by evaluating LLM outputs and preparing training datasets.

Software developer intern

August 2023 – October 2023 | **Skylabs d.o.o**

- Developed a Python wrapper for C++ libraries and exposed it through a RESTful API enabling remote interaction with embedded devices.

Education History

Electrical and Computer School Ptuj

Mechatronics Technician, June 2022

- Gained foundational engineering and technical skills.
- Engineered a coin-counting machine using Arduino Nano.

University of Maribor – FER

Bachelor of Computer Science, August 2025

- Built a strong foundation in computer science.
- Developed a full-stack system to support Direct4Me's smart parcel locker management via a web portal and a mobile app.
- Built an AI-powered mobile application.

Master of Computer Science, Present [Exp. 2027]

- Exploring distributed systems, DSP, machine learning, and domain-specific languages (DSLs).
